

Project 3: SQL – Mom and Pop Database

Victoria Lee

UMGC: University of Maryland Global Campus

CMSC 320: Relational Database Concepts and Applications

7/23/2024

Screenshots For SQL: Queries A and Results

Note: This is regarding the File: Lee_PROJ3_PART_C.sql

Disclaimer: You must run statements only and not auto-run the whole script file as all five queries include other tests from the beginning of the code.

Revisions: Since I changed the tables and modified it so that it would run correctly here is the updated Diagram order.

Customer → CustomerMovie → Movies

Movies → DistributorProducer

Movies → Actors

Movies → Actresses

Movies → Directors

Movies → Media

Movies → Awards

Awards → Actors

Awards → Actresses

Awards → Director

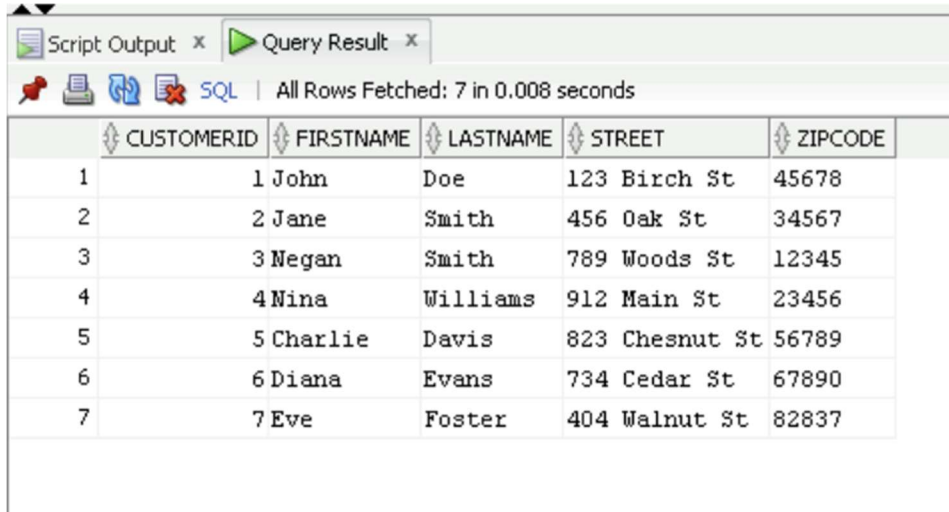

Media → DVD_Type

Media → VCR_Type

I also removed the two primary keys and made them into one for simplification. This is because the extra primary keys made it into a composite primary key that was not the design, I intended to do in project 2, so I modified it to make it more for what I wanted the design to be. I also removed some keys due to repetitiveness and introduced newer ones. For instance, the Media table has different keys and I also split Actors, actresses, and Directors into tables.

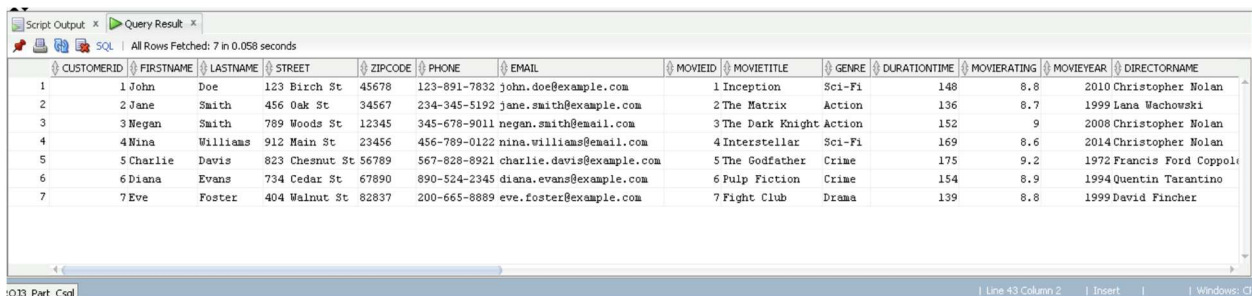

1. **Query & Result 1:** Retrieve all of your customers' names, account numbers, and addresses (street and zip code only), sorted by account number.

Generic Version:

	CUSTOMERID	FIRSTNAME	LASTNAME	STREET	ZIPCODE
1	1	John	Doe	123 Birch St	45678
2	2	Jane	Smith	456 Oak St	34567
3	3	Negan	Smith	789 Woods St	12345
4	4	Nina	Williams	912 Main St	23456
5	5	Charlie	Davis	823 Chesnut St	56789
6	6	Diana	Evans	734 Cedar St	67890
7	7	Eve	Foster	404 Walnut St	82837

Detailed Version (Scrolling to the right):

	CUSTOMERID	FIRSTNAME	LASTNAME	STREET	ZIPCODE	PHONE	EMAIL	MOVIEID	MOVIEITITLE	GENRE	DURATIONTIME	MOVIERATING	MOVIEYEAR	DIRECTORNAME

Screenshots for Part A and Part B Results (Correct Runs)

1. Part A (Lee_PROJ3_PART_A.sql):

2. Part B (Lee_PROJ3_PART_B.sql):

Note: I did not show all of the “rows added as it was quite long. It should run correctly and repeat for the other rows to add.

The screenshot shows an SQL Worksheet application with two tabs: 'Lee_PROJ3_Part_A.sql' and 'Lee_PROJ3_Part_B.sql'. The 'Worksheet' tab is active, displaying a script. The script includes comments about the execution order and three INSERT statements for the 'Customer' table. The 'Script Output' window at the bottom shows the results of the execution.
